I received a call from a David Peterson this morning of Delta Minerals. He called to advise that they have hired a new person/contractor to perform the required reclamation work that we have requested by performed by February 16th.

He stated that due to unforeseen, serious medical complications with another employee that they had previously lined up to do the work, they have fell behind in meeting the established time frame to complete the required reclamation. He also said they have had about a foot of snow onsite which has shut down their active operations for the past 3 weeks.

I asked Mr. Peterson to send us a letter today (via fax) explaining the circumstances, any work done to date, and a proposed schedule to complete the remaining reclamation work. He said they would ask for another 3 weeks to complete the reclamation work. He appreciated our willingness to work with them to achieve their required reclamation objectives.

A COPY OF THIS EMAIL WILL BE SENT TO THE MINE FILE - M/027080
